

Spring 2003 Math 308/501–502
4 Linear Second-Order Equations
4.4 Method of Undetermined Coeffs
Wed, 01/Oct ©2003, Art Belmonte

Summary

The **method of undetermined coefficients** is dealt with in full generality in the Section 6.3 lecture, *q.v.* Examples that deal with second-order equations are in the Section 4.5 lecture, *q.v.*
