Textbook: Victor J. Katz, A History of Mathematics, Brief Edition, Pearson Addison-Wesley, 2004, ISBN 0-321-16193-9. You'll also need a book to review that combines a nontrivial amount of history and a nontrivial amount of mathematics; rules and suggestions will be forthcoming soon.

Grading system and due dates: Weekly assignments (Monday mornings):

Book review (Mon. Oct. 9):

Second paper (see below) (Mon. Nov. 13):

Term paper: (Tue. Dec. 5)

Total

Short papers: The second paper will probably be a "position paper" in which you advocate a point of view on a topic to be assigned soon. The expected length of a book review or position paper is 5–10 pages (typed, HTML, etc.).

Term paper: This should be about 15–20 pages, or a comparable project in another medium. You should choose a topic by October 1.

Legal and ethical matters: Communication and cooperation among students is encouraged, but whenever two or more students work together on an assignment, they must all indicate so on their papers (or electronic submissions, in our case). The book review and second paper must be individual work, and the same is true of the term paper unless permission is obtained from the instructor (on the basis of a convincing proposal that a joint project will produce something of high quality). It should go without saying that the sources of all information, be it from books, the Internet, or human contacts, should be properly acknowledged (by footnotes, references, or remarks in the text), and that all copyright restrictions must be complied with.

Address for paper mail, and FAX number: (best avoided)

S. A. Fulling Mathematics Dept. Texas A&M University College Station, TX 77843-3368

Department (Blocker) FAX: (979) 862-4190
